WORK EXPERIENCE

Web Developer January, 2023 – Present

Freelance

- Create unique websites by combining technical expertise with creative vision, then customizing the results to fit the specific needs of every customer.
- Use an adaptable tech stack that includes HTML, CSS, JavaScript, Bootstrap, React.js to build online solutions that are visually pleasing, responsive, and solid in terms of functionality.
- Improve customer satisfaction by identifying their requirements and turning concepts into efficient and innovative digital solutions.
- Provide the best possible user experiences across screens and devices of all sizes, implement responsive design principles.
- Keep up with the latest developments in technology trends, and continuously implement abilities to deliver advanced and sophisticated online platforms.

Journalist / Content Writer June, 2012 – April 2018

Newspaper & online platforms, Ukraine

- Crafted compelling articles, covering a diverse range of topics from breaking news to in-depth features, worked to provide valuable insights to readers (freelance and full-time).

PROJECTS

E-Commerce website (HTML, CSS, JavaScript, Bootstrap, PHP)

- Build a feature-rich web store, implemented a responsive and user-friendly design with mobile compatibility.

Portfolio landing page (HTML, CSS, JavaScript, AOS animation)

- Designed and developed a personal portfolio website to showcase projects and skills.

Weather App (React, API Integration)

- Created an application that fetches real-time weather data from a weather API, displayed the weather forecast for a user-specified location and provided relevant weather information.
